

— A SIX-MONTH PRIVATE MENTORSHIP

Trade with rules. *Think* with data. *Execute* with discipline.

A personal 1:1 mentorship with Darshan Rathod,
Director & COO of Multyfi — built to move you from
random, emotional trading into rule-based,
backtested, automated systems.

- ✓ Personal guidance — not a pre-recorded course
- ✓ Indices, stocks & commodities — gold, silver, natural gas

DIRECT ACCESS

~2 Hrs

PER WEEK

Darshan Rathod

Director & COO, Multyfi

You don't need more time to trade. You need a *system* that doesn't need you there.

Millions of Indians are trading more than ever — through jobs, meetings, and family time. More screen time hasn't meant more consistency. Here's what the data shows.

91%

of individual traders lost money in the equity F&O segment in FY 2025.

SOURCE — SEBI STUDY, FY25

60–75%

of trading volume in major global equity markets is now algorithm-driven.

SOURCE — INDUSTRY MARKET DATA, 2025

Manual, emotion-led trading around a full-time job is a structurally losing game — you're reacting to setups minutes after institutions already acted on them.

The traders who last aren't reacting faster. They're following rules they tested before risking a single rupee.

FROM THE MENTOR'S OWN JOURNEY

From an early ₹50L loss to running *systematic* strategies at scale

Darshan started trading in 2016 with passion and no system. A costly early lesson in risk management became the turning point — the same shift this mentorship gives you, without the decade it took him to learn it.

From ₹50L Loss
to ₹200Cr AUM

Started Trading
with no system
The New Lesson

Why most traders stay *stuck* in random trading

It's rarely about intelligence. It's about never having learned to think, test, and trade like a systematic trader.

01

Tips & Telegram calls aren't a system

Following random calls with no tested logic behind them is gambling with extra steps — every trade becomes a coin flip instead of a repeatable decision.

02

No statistical edge

Without backtesting, expectancy analysis, and real ratios behind a strategy, you're trading a belief — not a system that's been proven to hold up over time.

03

Emotions run the show

Fear cuts winners short, hope holds losers too long — and after a full day of work, you're making financial decisions in the worst possible mental state.

04

One strategy doesn't fit every market

Indices, stocks, gold, silver, natural gas, and options each behave differently — and each needs its own tested rules, not a single borrowed setup.

05

Knowledge without automation still needs you present

Even a genuinely good strategy fails if it depends on you being at your screen at the right minute. Without automation, your edge is only as reliable as your availability.

None of this is a character flaw. It's what happens when nobody ever taught you to trade like a *systematic trader* — which is exactly where this mentorship starts.

INTRODUCING

Multyfi 1:1 Systematic Trading Mentorship

A Personal Mentorship, Not a Recorded Course

- 01 Darshan Rathod, Director & COO of Multyfi, personally guides you — solving doubts, reviewing your thinking, and helping you build a structured trading approach.
- 02 Just 2 hours a week. Over 6 months, you learn to think, test, improve, and automate like a systematic trader — without quitting your job.
- 03 Covers indices, stocks, and commodities — gold, silver, natural gas — across equity, futures, and options strategies.

Not a course. *A system you build.*

Every module is sequenced to move you from understanding markets to running your own automated strategy.

FOUNDATION

Systematic Thinking

Market structure & the mindset that separates systematic traders from gamblers.

VALIDATION

Backtesting & Edge

Statistical edge and expectancy before a rupee is risked live.

ENGINEERING

No-Code Automation

Automate tested strategies without writing production code.

EXECUTION

Live Strategy Running

Options, futures, equity & commodity strategies — run with discipline.

Courses teach you to watch. A personal mentor teaches you to *think* — reviewing your setups, correcting your process, and holding you to the same discipline he uses on his own capital.

Built for traders who already have a *full-time life*

FORMAT	DURATION	COMMITMENT	OUTCOME
1:1 Online From anywhere	6 Months 11 structured modules	~2 Hrs/Wk Fits a full-time job	Your System Tested & automated

- 

Personal 1:1 Mentorship
Directly with Darshan Rathod, Director & COO of Multyfi — not a pre-recorded video series, but real doubt-solving and guidance.
- 

Only 2 Hours a Week
Designed so you never have to choose between your career and building your trading system.
- 

Indices, Stocks & Commodities
Structured strategies across equities, indices, gold, silver, natural gas, and select futures instruments.
- 

No-Code Algorithmic Automation
Automate your best strategies through a practical, beginner-friendly approach — no programming background required.
- 

Risk-First, Statistically Backed
Backtesting, statistical edge, position sizing, and risk management are built into every strategy you learn.
- 

Ongoing Accountability
A mentor who checks in weekly — not a portal you forget about after week two.

MARKETS YOU'LL TRADE

- Indices
- Equity
- Gold
- Silver
- Natural Gas
- Futures

One focused session with Darshan, one strategy or concept to apply — and the rest of your week stays exactly as busy as it already is. *The system carries the load, not your calendar.*

Six months. Three phases. *One systematic trader.*

Eleven modules, sequenced deliberately — from reading a chart to running your own automated system.

01

MONTH 1-2 · MODULES 1-4

Foundation

Build your analytical base — price action, chart structure, and your first rule-based trading system, tested and understood before you risk anything live.

Foundation of Systematic Trading

Your First Trading System

Advanced Supertrend System

Premium 7-Minute Strategy

02

MONTH 3-4 · MODULES 5-8

Validation & Mindset

Learn to prove an edge with data before trusting it with capital — and build the psychological discipline that keeps you following your own rules.

Statistical Edge & Backtesting

Trading Psychology & Mindset

Algorithmic Trading Made Easy

Equity Momentum Investing

03

MONTH 5-6 · MODULES 9-11

Mastery & Execution

Refine your setups, unlock the mindset that carries it through — and graduate with advanced strategies running exactly the way you tested them.

Tightness Intraday Setup

Infinite U

Advanced 7-Minute & Option Strategies

SKILLS YOU'LL UNLOCK ALONG THE WAY

Reading price action

Rule-based system design

Backtesting & expectancy

No-code automation

Risk & position sizing

Trading psychology

Options & expiry strategies

Live execution

By month six: *a fully coded, backtested trading system of your own* — not borrowed — running with a risk framework built in from day one.

Foundation

Month 1–2 · Modules 1–4

01 Foundation of Systematic Trading

Why successful trading needs rules, discipline, and structure.

LEARN

- Core principles & why systematic trading works
- The systematic trader's mindset

BE ABLE TO

- Recognise when a setup is rule-based vs. a guess
- Think in probabilities, not predictions

02 Construct Your First Trading System

Build your first trading system from scratch.

LEARN

- Types of systematic trading strategies
- Supertrend + Heiken Ashi trading system

BE ABLE TO

- Structure a complete trading system end to end
- Run your first fully rule-based setup

03 Advanced Supertrend Trading System

Improve and manage the Supertrend system in real conditions.

LEARN

- Advanced rules & gap-up/down handling
- Learnings pulled straight from backtesting

BE ABLE TO

- Diagnose and fix a system that's underperforming
- Handle volatile opens without panic-editing your rules

04 Premium 7–Minute Trading Strategy

A Multyfi premium futures strategy — 7 minutes of your day.

LEARN

- Indices, gold, silver, natural gas, crypto, forex & futures
- When to start, pause, and modify the system

BE ABLE TO

- Run a complete strategy in minutes, not hours
- Trade multiple markets with one repeatable process

End of Phase 01: you'll read price action with confidence and run your first tested, rule-based systems across multiple markets.

Validation & Mindset

Month 3–4 · Modules 5–8

05 Statistical Edge, Backtesting & Pledging

How professional traders validate a system before going live.

LEARN

- Statistical edge & backtesting ratios
- Pledging concepts & dual income from one investment

BE ABLE TO

- Prove an edge with numbers, not conviction
- Read a backtest report and trust — or reject — it

06 Trading Psychology & Mindset

Trading success is not only about strategy — it's mindset too.

LEARN

- Psychology of a systematic trader
- Mastering your own mind under pressure

BE ABLE TO

- Follow your rules after a losing streak
- Separate your mood from your execution

07 Algorithmic Trading Made Easy

Automate trading systems with a beginner-friendly approach.

LEARN

- No-code automation & delta-neutral portfolios
- Nifty-Sensex high-capital & expiry systems

BE ABLE TO

- Automate a tested strategy without writing code
- Let a system trade while you're in a meeting

08 Equity Momentum Investing System

The Volatility Contraction Pattern — capturing momentum in stocks.

LEARN

- Momentum investing — Levels 1, 2 & 3

BE ABLE TO

- Spot momentum setups before the crowd does
- Size positions for a swing, not a gamble

End of Phase 02: you'll know your statistical edge before risking capital, trade with a calmer mindset, and be ready to automate the strategies you've validated.

Mastery & Execution

Month 5-6 · Modules 9-11

09 Tightness Intraday Setup

An intraday setup focused on price tightness and momentum.

LEARN

- Tightness setup — Steps 1, 2 & 3

BE ABLE TO

- Identify high-probability intraday compression
- Time entries with far more precision

10 Infinite U — Unlock Your True Potential

Your mind, body, energy, habits, goals, and execution power.

LEARN

- Mastering body-mind-spirit & activating inner power
- Goal setting & turning knowledge into results

BE ABLE TO

- Actually execute what you've learned, consistently
- Set goals that survive contact with a losing week

11 Advanced 7-Minute & Option Trading Strategies

Advanced modules to round out your systematic toolkit.

— GRADUATION

By month six, you don't just *know more* — **you trade differently.**

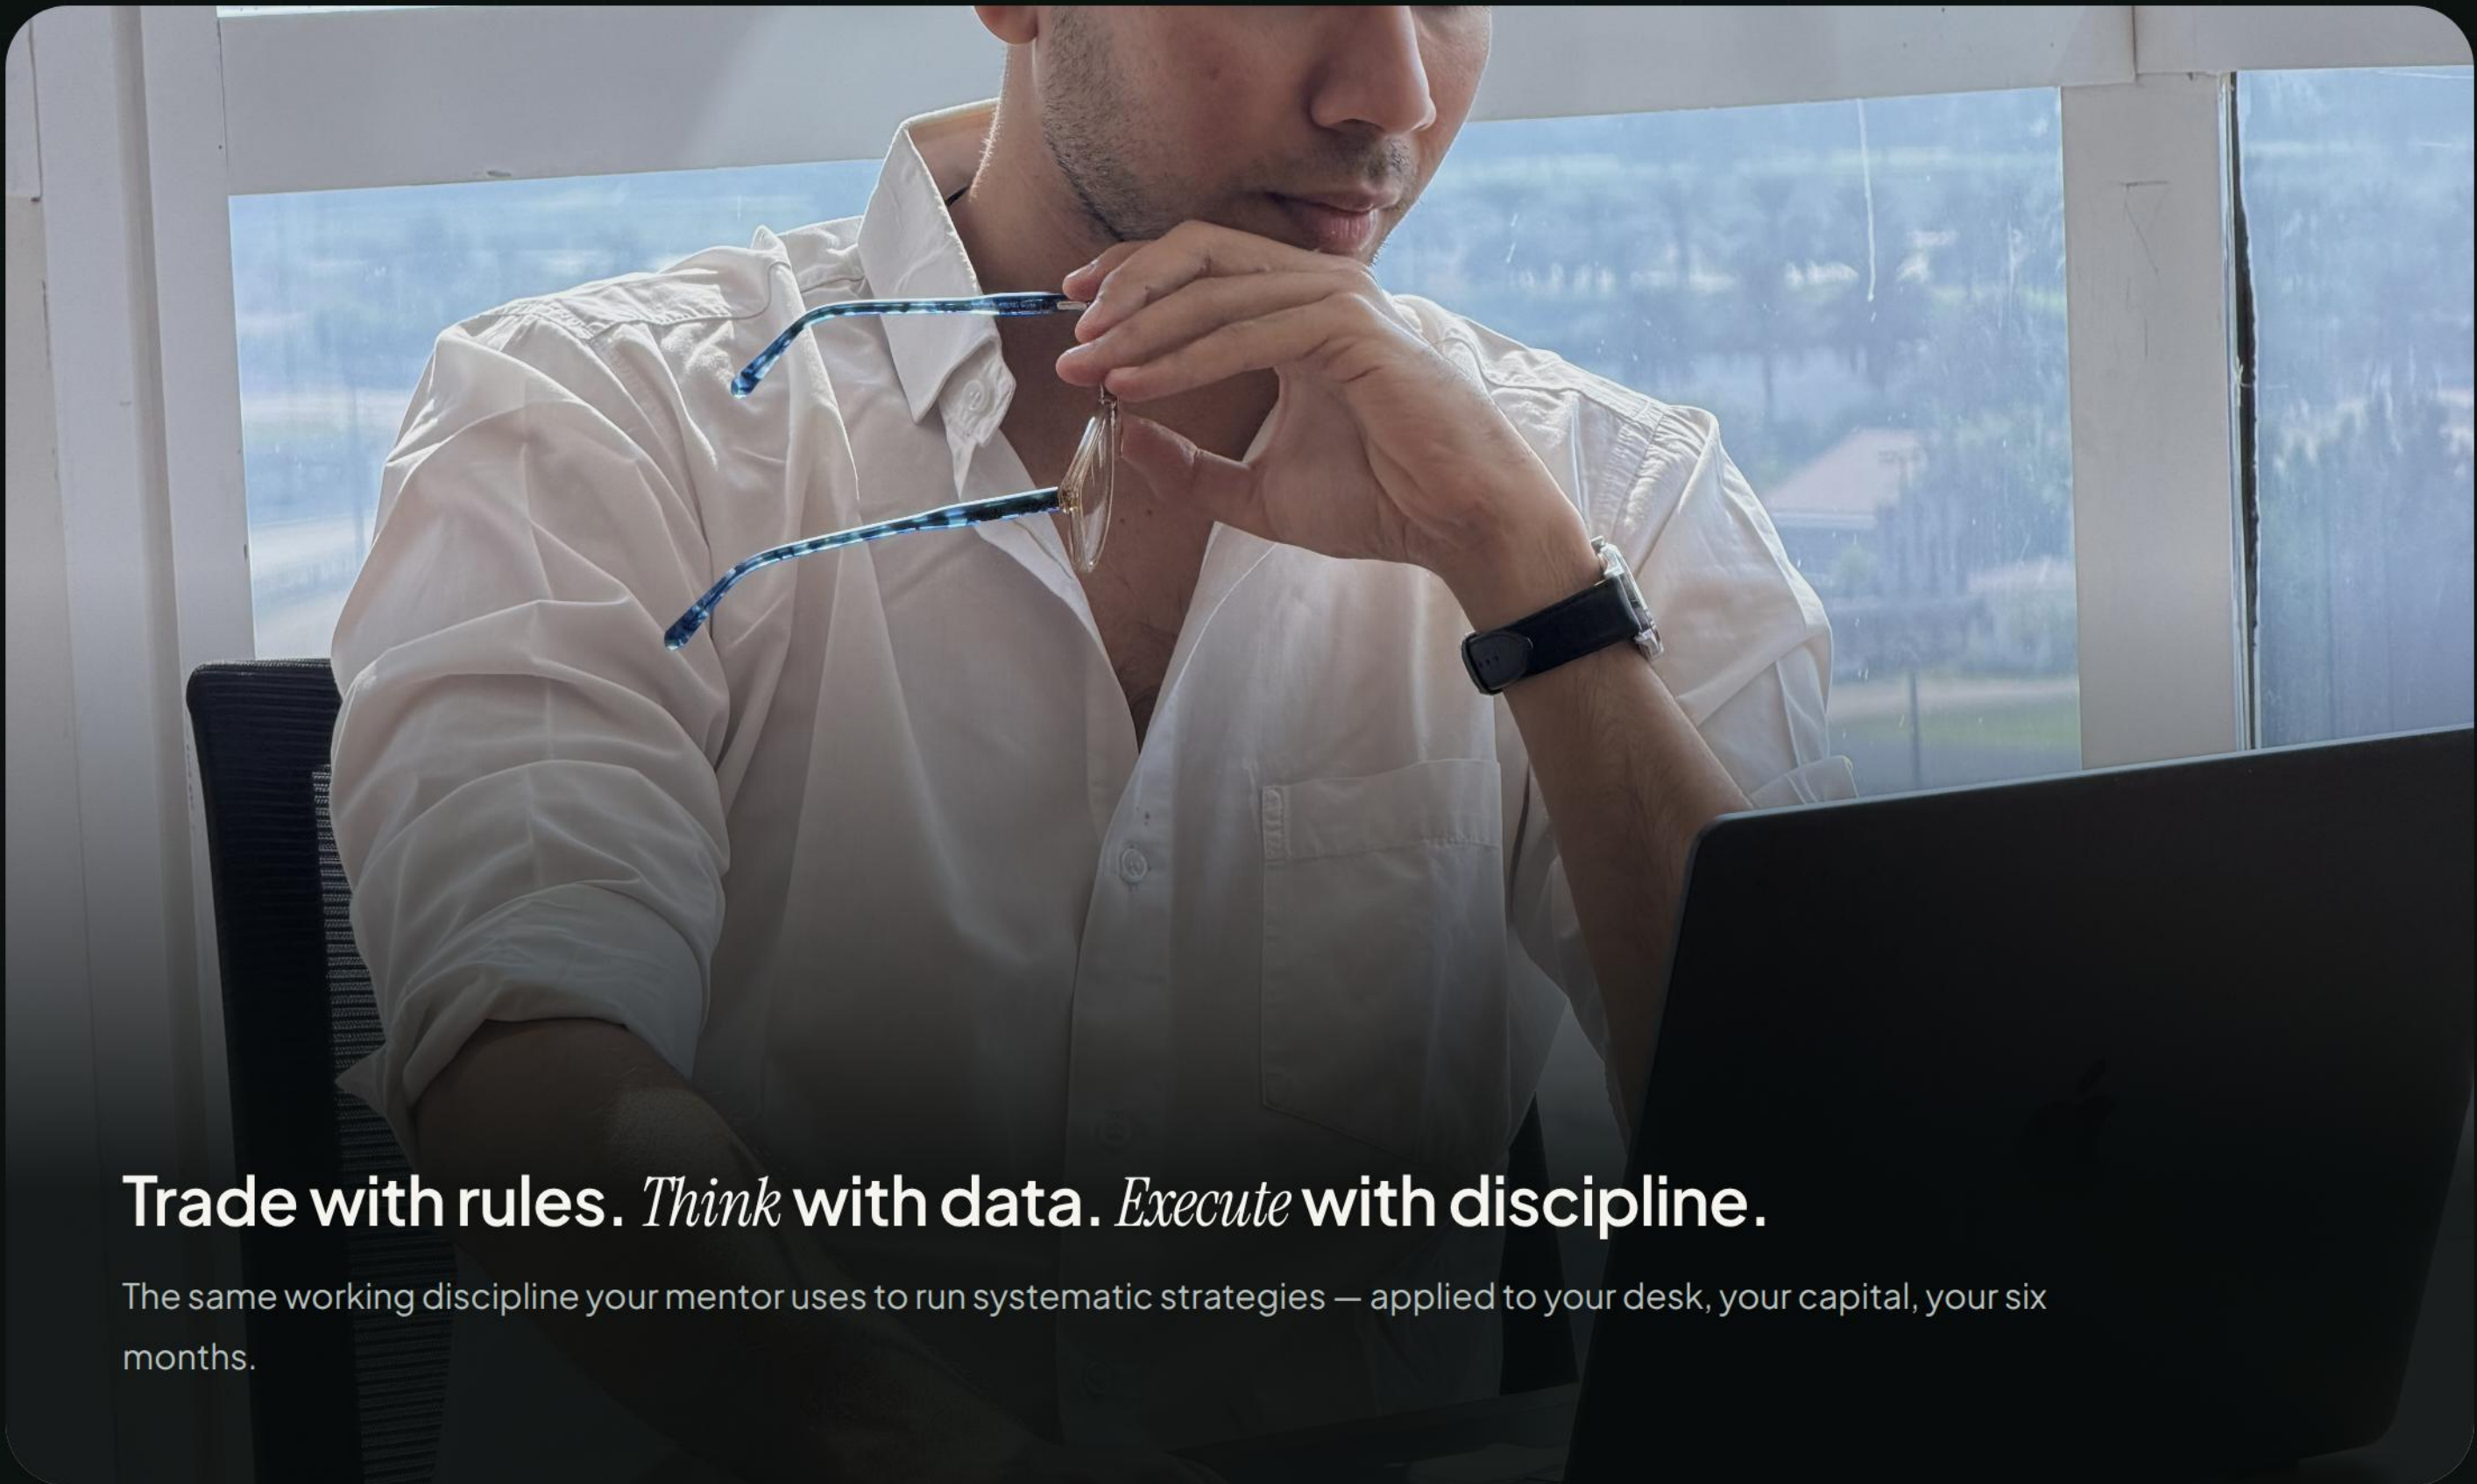

A fully coded, backtested trading system of your own — not borrowed — running with a risk framework built in from day one.

- ☒ Your own system
- ☒ Fully automated

Everything packed into *six months*

✓ 6-Month Personal Mentorship	✓ Direct 1:1 Doubt Solving & Personal Guidance
✓ Only 2 Hours Required Per Week	✓ Systematic & Rule-Based Trading Approach
✓ Options, Futures, Equity, Index & Commodity Strategies	✓ Backtesting, Statistical Edge & Risk Management
✓ Psychology, Position Sizing & Trading Discipline	✓ No-Code Algorithmic Trading & Automation
✓ Real Trading Systems with Practical Implementation	✓ Ongoing Support Throughout the Mentorship

Trade with rules. *Think* with data. *Execute* with discipline.

The same working discipline your mentor uses to run systematic strategies — applied to your desk, your capital, your six months.

— YOUR MENTOR

Darshan Rathod

Director & COO, Multyfi

Darshan started trading in 2016 with raw passion and no system. An early, costly loss became his biggest lesson in risk management — the turning point toward disciplined, systematic strategies he now teaches directly to every mentee.

● 2016 · GETTING STARTED

Started Trading

Entered the markets with raw passion and zero system.

● EARLY YEARS · THE HARD LESSON

A Costly Lesson in Risk

A significant early loss became the turning point on risk management.

● TURNING POINT

Consistency Through Systems

Became consistently profitable by building tested, rule-based systems.

● TODAY

Building & Teaching Systems

Runs Multyfi and personally mentors traders in systematic, automated trading.

Spoke at BSE — 5paisa Algo Convention

Guest Session — Masters' Union

Director & COO — Multyfi, The Quant Platform

The same discipline that turned an early ₹50L loss into a decade of systematic, rule-based trading is *exactly what gets passed on to every mentee.*

Built for traders ready to *change how they trade*

This mentorship is ideal for traders who are tired of random trading, emotional decisions, losses, confusion, and lack of structure.

WHERE YOU ARE NOW

Random & Reactive

- × Trading on tips, Telegram calls, and gut feel
- × No tested edge behind your entries
- × Emotional decisions after a full day of work
- × No structure, no consistency, no confidence

WHERE YOU'LL BE

Systematic & In Control

- ✓ Trading rules you've personally tested and trust
- ✓ A statistically validated edge, proven before going live
- ✓ Discipline that holds under pressure — and after losses
- ✓ A fully coded, automated system running in the background

Final *outcome*

By the end of this mentorship, you will understand how to build, test, improve, automate, and follow trading systems across different markets. You will gain clarity on systematic trading, strategy execution, risk management, psychology, and automation — so you can approach trading with structure and confidence.

Long-Term Wealth Building

This isn't a strategy for one good month. *It's a system for a career.*

Stop trading randomly. *Start trading systematically.*

Six months. One mentor. A trading system that's actually, finally, yours.
